

# SENSIRION AUTOMOTIVE SOLUTIONS AT A GLANCE

Automotive Sensor Solutions for Increased Well-Being and Energy Efficiency

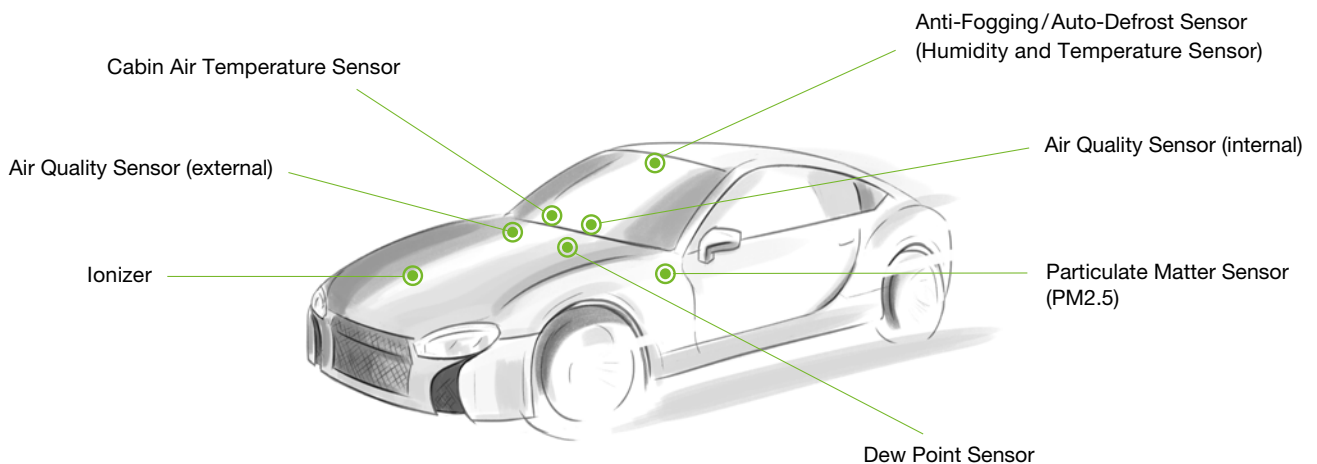

- OEM and Tier 1 automotive sensor supplier since 20 years
- Broad knowledge of integration and applications
- R&D centers in Switzerland, South Korea and China

# AUTOMOTIVE SENSOR SOLUTIONS FOR INCREASED WELL-BEING AND ENERGY EFFICIENCY

Sensirion Automotive Solutions specializes in designing, developing and manufacturing environmental sensors for the automotive industry. With sales offices in China, South Korea, the US and Switzerland, we offer top-quality local support to OEM and Tier 1 suppliers around the world.

Our main focus is on environmental sensors for automotive climate control and comfort applications as well as supporting energy efficiency by making use of various sensing technologies to measure, for example, particle matter concentrations, relative humidity, temperature and gas concentrations. Sensirion Automotive Solutions is organized as a legally independent entity within the Sensirion holding and currently employs approx. 160 employees.

## ENVIRONMENTAL SENSORS PORTFOLIO

## QUALITY AND SUSTAINABILITY

We continuously improve our manufacturing processes by using resources more efficiently, improving our regulatory compliance, reducing our energy and water footprint, and developing programs to achieve more innovative manufacturing facilities. Our products and production processes meet the most stringent standards, allowing us to deliver on our promises to customers.
